Work Experience

Incresco

Full Stack Software Engineer

Jan 2025 – Present

Bangalore, India

- Developed scalable full-stack applications using **Next.js, NestJS, and FastAPI**, supporting **1000+ active users** across enterprise and AI-driven platforms.
- Built a **multi-tenant AI system** using **LLMs and RAG**, enabling users to query documents (PDF/DOCX) with **semantic search via MongoDB Vector DB**, improving information retrieval efficiency by **60%**.
- Integrated **Azure AI services (Azure Video Indexer)** and optimized **LLM prompt pipelines**, enhancing response accuracy and reducing irrelevant outputs.
- Designed and implemented **OCR-based document processing**, reducing manual data entry effort by **70%**, and integrated **Salesforce, partner systems, and Zoom APIs** for seamless workflows.
- Built **event-driven architectures on AWS** (Lambda, S3, SQS, SNS, API Gateway, EventBridge), improving system scalability and reducing processing latency for asynchronous tasks.
- Managed infrastructure using **Terraform**, monitored via **CloudWatch**, and ensured secure access using **AWS IAM**, improving deployment consistency and system reliability.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend & APIs: Node.js, NestJS, FastAPI, REST APIs, API Design, Authentication & Authorization

AI & Data: LLMs, Retrieval-Augmented Generation (RAG), LangChain, MongoDB Vector DB, Prompt Engineering

Cloud & DevOps: AWS (Lambda, S3, SQS, SNS, API Gateway, EventBridge, CloudWatch, IAM, ECS, EC2), Azure AI Services, Terraform, CI/CD

Databases: MongoDB, DynamoDB, PostgreSQL, MySQL

CS Fundamentals: DBMS, OOPs, Data Structures

Tools & Collaboration: Git, GitHub, VS Code, Antigravity, AugmentAI, Cursor, Nginx, GitHub Actions, Postman, Debugging, Logging, Documentation

Projects

Multi-Tenant Electronic Medical Record (EMR) System

- Built a scalable **multi-tenant EMR platform** using **Next.js, NestJS, Prisma, and MongoDB**, implementing tenant-level data isolation and role-based access control with JWT authentication.
- Developed real-time patient queue management with **Socket.IO**, automated prescription PDF generation using **Puppeteer**, and secure document storage via **Cloudinary**.

Text-to-Image Generator (MERN + ClipDrop API)

- Developed an AI-powered **text-to-image generation tool** using **ClipDrop API** integrated with the **MERN stack**.
- Designed a responsive UI for prompt input, image rendering, and gallery management with optimized state handling and performance.

Real-Time Chat Application (MERN + Socket.IO + LiveKit)

- Built a real-time chat application using **MERN stack** and **Socket.IO** for messaging, with media handling via **Cloudinary**.
- Implemented **audio and video communication** using **LiveKit SDK**, enabling real-time peer interactions with optimized event handling and UI synchronization.

Education

Bangalore Institute of Technology, Bangalore

B.Tech in Computer Science & Engineering

2021 – 2025

8.36/10 CGPA

Algorithmic Competitions/Achievements

- Problem-Solving Mastery: Successfully solved challenging programming problems on various competitive platforms.
- Solved over **200+ questions** on multiple platforms like **GeeksforGeeks, LeetCode, and CodingNinjas**.
